

## Nets Merchant Portal

The Nets Merchant Portal will provide you with a good overview of approved card transactions from Nets' payment terminals and e-commerce solution (Netaxept).

Once you have logged into the portal, you can search for individual transactions, as well as get a revenue overview on card types such as Visa, MasterCard, American Express, Diners Club etc.

All transactions in batches submitted in the daily reconciliation are available.

You can easily generate statistics and see graphs of financial statements for your business. The information you see online, you can also print or export to a file for further processing.

The portal presents detailed transaction information both for separate merchants and for chains in your country, as well as for Nordic chains with shops spread across several countries. Turnover is summarised for optional time interval, based on payment method and currency.

### NETS' MERCHANT PORTAL IS AVAILABLE IN TWO VERSIONS:

- Basic – Reduced functionality, for businesses with fewer requirements
- Premium – Full functionality

### BASIC FUNCTIONALITY

- An online tool 24/7/52 for your business
- User-friendly interface, transparent and easy to navigate
- User Guide, glossary etc. available from within the portal
- Select reconciliation information on e.g. period, different card types, currency and point of sale
- Select transaction information on e.g. period, different types of cards, currencies, purchase amount, part of the card number and points of sale
- View detailed information about your merchants / points of sale

### PREMIUM FUNCTIONALITY also includes

- Register and administer your own users and their privileges
- Produce statistics for any reconciliation period accumulated on year, month, week or day
- Export search results to Excel, XML or CSV format for further processing
- See Netaxept non-card financial transactions, imported in near real time
- Create customised report templates for faster searching
- Create new virtual merchants consisting of optional payment terminals and merchants /points of sale, for customisation of transaction search based on of your business specific needs
- Name the terminal ID:s for easier search and tailored search result lists
- Order the delivery of daily e-mails, with information on merchants that have not done EOD the previous day
- Order the delivery of daily transaction or batch files, either via e-mail or download them via SFTP (additional service at an extra cost)
